

I'm not a robot

Continue

Looks like you're having trouble with the Galaxy S360. I've seen this error message before. It's usually caused by a corrupted cache or data. You can try clearing the cache and data for the Play Store. To do this, go to Settings > Apps > Play Store > Storage > Clear Cache. If that doesn't work, you can also try clearing the data. To do this, go to Settings > Apps > Play Store > Storage > Clear Data. If you're still having trouble, you can try uninstalling the Play Store app and then reinstalling it. I hope this helps!
